Dear private client,

I am writing to express my interest in the paid internship opportunity as a web developer with a focus on React.js, Tailwind CSS, Express.js, and MongoDB in your team. As a highly motivated and dedicated student, I am eager to apply my skills and gain practical experience in a professional setting.

I am currently pursuing a degree in software engineering at Arbaminch University, where I have developed a strong foundation in web development and gained hands-on experience with React.js, Tailwind CSS, Express.js, and MongoDB. Through various projects and coursework, I have honed my skills in front-end and back-end development, creating responsive and user-friendly web applications.

One of my notable projects includes building a dynamic e-commerce website using React.js and integrating it with an Express.js backend and MongoDB database. This project allowed me to showcase my proficiency in these technologies and my ability to work with complex frameworks and databases. I am passionate about creating efficient and scalable web solutions and continuously strive to stay updated with the latest industry trends and best practices.

In addition to my technical skills, I am a strong problem solver and a quick learner. I am adept at collaborating with team members and effectively communicating ideas. I am highly organized, detail-oriented, and able to manage multiple tasks simultaneously. I am confident that my skills and enthusiasm for web development make me a strong candidate for this internship.

I am excited about the opportunity to contribute to your team and learn from experienced professionals in the field. I believe that this internship will provide me with valuable industry exposure and help me further develop my skills as a web developer.

Thank you for considering my application. I have attached my resume for your review. I would welcome the opportunity to discuss how my qualifications align with the requirements of the internship. Please feel free to contact me at your convenience to schedule an interview.

Thank you for your time and consideration.

Sincerely,

Amanuel Teshale

ABOUT ME

I am a highly motivated and dedicated individual with a passion for technology and innovation. With a strong background in software development and a keen interest in creating user-friendly applications, I have recently built a weather app that provides accurate and up-to-date weather information for any city and crypto coin that lets anyone to updated of any coins that is on the market to be purchased. I thrive in fast-paced environments and enjoy collaborating with cross-functional teams to deliver high-quality solutions. My strong problem-solving skills and attention to detail allow me to tackle complex challenges and deliver results. I am constantly seeking opportunities to learn and grow, and I am excited to contribute my skills and expertise to a dynamic organization. With a proven track record of delivering successful projects, I am confident in my ability to make a positive impact. Thank you for considering my application.

EDUCATIONS

2012 - 2016

TO BE AWARDED (Software Engineering)

Arbaminch university, Arbaminch, Ethiopia

Currently I am 4th year student of software engineering. I'm going to have my degree after one year and I've earned 3.72 cumulative cgpa until this time

PROJECTS

Crypto Gebya

3 weeks (Alone)

Front-end developer

Introducing our cutting-edge cryptocurrency coins list app, your ultimate companion for staying up-to-date with the ever-evolving world of digital currencies. With our app, you can effortlessly access real-time information on the current status of various cryptocurrencies, including their prices, market capitalization, trading volume, and more. Stay informed about the latest trends, track your favorite coins, and make informed investment decisions. Whether you're a seasoned crypto enthusiast or just starting your journey, our user-friendly interface and comprehensive data will empower you to navigate the exciting realm of cryptocurrencies with confidence. Download our app now and embark on a thrilling adventure in the world of digital assets.<http://cryptoapibuiltbyaman.netlify.app>

Weather app

2 weeks (Alone)

Front-end developer

Introducing my innovative weather app! Stay informed about the weather conditions of any city with just a few taps. Our app provides accurate and up-to-date weather forecasts, including temperature, humidity, wind speed, and more. Whether you're planning a trip, getting ready for outdoor activities, or simply curious about the weather, our app has got you covered. With a user-friendly interface and intuitive design, accessing the weather information you need has never been easier. Visit our weather app today and stay one step ahead of the elements.<http://weatherappbuiltbyaman.netlify.app>

JOB api

1 week (Alone)

Back end developer

A job REST API built using Express and MongoDB is a web service that allows users to perform various operations related to job management. It provides a set of endpoints that enable users to

various operations related to job management. It provides a set of endpoints that enable users to create, read, update, and delete job records stored in a MongoDB database. With this API, users can create new job listings by sending a POST request with the necessary details such as job title, description, and requirements. They can also retrieve job information by sending a GET request to the appropriate endpoint, either fetching a specific job or a list of all available jobs. Updating job details is possible by sending a PUT request to the API, specifying the job ID and the updated information. Similarly, users can delete a job by sending a DELETE request with the corresponding job ID. This REST API provides a convenient and standardized way for developers to interact with job data, making it easier to integrate job management functionality into their applications. It leverages the power of Express, a popular Node.js framework, for handling HTTP requests and responses, while MongoDB serves as the database for storing and retrieving job records.
